|----------------|--------------------------|--------------------------------------|
| 1. Br/B | 12V switched | |
| 2. B/W | Ground | |
| 3. O/B | Kill switch | (Ground is OFF) |
| 4. Bu/Y | Pick-up coil | (Original resistance 50~170Ω) |
| 5. G/R | CDI ignition coil | |
| 6. IG/R | Pick-up coil | |
| 7. W | Forward | <i>(not on Carmo-CDI)</i> |
| 8. R | Reverse | <i>(not on Carmo-CDI)</i> |
| 9. - | - | |
| 10. Bu | Neutral | <i>(not on Carmo-CDI)</i> |
| 11. W/G | Dashboard | <i>(not on Carmo-CDI)</i> |
| 12. G/Y | - | |

Advanced digital Carmo-CDI, without the 'extra's' as:

- Forward en reverse settings, quad goes as fast forward and reverse, no limiter anymore.
- Neutral setting, engine also can make higher rpm in Neutral but Neutral dash light still works
- When the TGB has a tachometer, it will not work anymore with the Carmo CDI
